S U M M A R Y

Data Scientist / Machine Learning Engineer with 2+ years of experience in Python, SQL, and Machine Learning. Proficient in using Pandas and NumPy for data wrangling, feature engineering, and data analysis. Experienced in building and evaluating ML models for classification and regression tasks. Strong analytical mindset with a keen interest in solving real-world problems using data-driven techniques.

E X P E R I E N C E

BEXO.AI

AI/ML Training

June 2026 – Present

Mohali

- Undergoing hands-on training in advanced AI/ML concepts, model development, and applied data science workflows.
- Working on real-world AI/ML training tasks to strengthen practical skills in model building, evaluation, and deployment.

Drift Technologies

Junior ML Engineer (Full-Time)

Apr 2024 – May 2026

Chandigarh, India (On-Site)

- Developing basic Machine Learning models.
- Performing data preprocessing and data cleaning tasks.
- Implementing feature engineering techniques to improve model performance.
- Evaluating and testing ML models using appropriate metrics and methodologies.
- Assisting in the development and improvement of AI-based solutions.

Macrew Technologies Pvt Ltd

SEO Executive (Full-Time)

July 2022 – March 2024

Mohali, India (On-Site)

Primotech

SEO Analyst (Full-Time)

March 2021 – June 2022

Mohali, India (On-Site)

P R O J E C T S

Smart Parking Space Counter Using OpenCV

[GitHub](#)

Python, OpenCV, NumPy, CVZone, JSON, Computer Vision, Image Processing

- Developed a real-time smart parking space detection system using Python and OpenCV to identify vacant and occupied parking slots from video footage.
- Implemented image preprocessing techniques including grayscale conversion, Gaussian blur, adaptive thresholding, median filtering, and morphological dilation to improve detection accuracy.
- Built a parking slot annotation tool to mark parking regions interactively and stored slot coordinates in JSON format for efficient reuse.
- Designed a pixel-based occupancy detection algorithm to analyze each parking space, display live availability, and provide real-time parking statistics.

Diabetes Prediction Using Support Vector Machine

[GitHub](#)

Python, Scikit-learn, SVM, Pandas, NumPy, Matplotlib, Seaborn

- Built a binary classification model to predict diabetes onset using the Pima Indians Diabetes Dataset with Support Vector Machine (SVM).

- Performed end-to-end data preprocessing – missing value treatment, feature scaling with StandardScaler, and stratified train-test split.
- Evaluated model using accuracy, precision, recall, and F1-score; visualized feature correlations using Seaborn heatmaps to guide feature selection.
- Applied hyperparameter tuning (kernel, C, gamma) to optimize SVM classification performance on healthcare data.

Regression Projects – Predictive Modelling

[GitHub](#)

Python, Scikit-learn, Linear/Ridge/Polynomial Regression, Pandas, Matplotlib, Seaborn

- Developed multiple regression models (Linear, Ridge, Polynomial) to predict continuous outcomes such as house prices and salary estimates.
- Performed EDA and feature engineering – identified key predictors, handled outliers, and reduced multicollinearity to improve model reliability.
- Benchmarked models using R^2 score, MAE, and RMSE; validated assumptions via residual plots and prediction curves.
- Delivered well-documented Jupyter notebooks demonstrating the complete ML pipeline from raw data ingestion to final predictions.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Regression & Classification, Clustering, Model Training & Evaluation, Feature Engineering, Hyperparameter Tuning, Cross-Validation, SVM

Data Analysis: Data Cleaning, Data Transformation, Outlier Detection, Exploratory Data Analysis (EDA), Data Visualization

Databases: MySQL, SQL (Joins, Group By, Subqueries, Window Functions – Basic to Advanced)

Tools: Jupyter Notebook, Google Colab, Git, GitHub, VS Code

EDUCATION

Chandigarh Group of Colleges, Jhanjeri

CGPA: 7.88

Bachelor of Technology in Computer Science and Engineering

2017 – 2021

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Statistics and Probability, Machine Learning, Artificial Intelligence, Object-Oriented Programming.

Certifications: Python – Udemy • Python (Basic) – HackerRank • SQL (Basic) – HackerRank • SQL (Intermediate) – HackerRank • SQL (Advanced) – HackerRank • Python for Data Science, AI Development • Supervised Machine Learning: Regression and Classification
